

### Incident Status Summary (ICS-209)

1: Date <b>05/31/2007</b>	2: Time <b>1900</b>	3: Initial   Update   Final   <b>XX</b>	4: Incident Number <b>FL-BCP-000044</b>	5: Incident Name <b>BICY Complex</b>		
6: Incident Kind <b>Wildland Fire</b>	7: Start Date Time <b>05/04/2007 0000</b>	8: Cause <b>Lightning</b>	9: Incident Commander <b>Whitney</b>	10: Incident Command Organization <b>Type 1 Team</b>	11: State-Unit <b>FL-BCP</b>	
12: County <b>Collier</b>	13: Latitude and Longitude Lat: <b>26° 12' 43"</b> Long: <b>80° 58' 10"</b> Ownership: <b>FL-BCP</b>		14: Short Location Description (in reference to nearest town): <b>Portions of Big Cypress National Preserve</b>			
<b>Current Situation</b>						
15: Size/Area Involved <b>60,288 ACRES</b>	16: % Contained or MMA <b>65 Percent</b>	17: Expected Containment Date:	18: Line to Build	19: Estimated Costs to Date <b>\$5,166,884</b>	20: Declared Controlled Date: Time:	
21: Injuries this Reporting Period: <b>0</b>	22: Injuries to Date: <b>1</b>	23: Fatalities <b>0</b>	24: Structure Information			
			Type of Structure	# Threatened	# Damaged	# Destroyed
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- <b>XX</b> No evacuation(s) imminent -- Potential future threat ----- No likely threat -----			Residence	<b>0</b>	<b>0</b>	<b>0</b>
			Commercial Property	<b>0</b>	<b>0</b>	<b>0</b>
			Outbuilding/Other	<b>8</b>	<b>0</b>	<b>0</b>
26: Communities/Critical Infrastructure Threatened (in 12, 24, 48 and 72 hour time frames): 12 hours: <b>In holdings within the Preserve, Seminole community of 300 to 400 homes and light density rural agriculture on State Protection Lands north of the preserve boundaries.</b> 24 hours: <b>Seminole Reservation and Florida Division of Forestry lands north of Preserve Boundaries.</b> 48 hours: 72 hours:						
27: Critical Resource Needs(kind & amount, in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: <b>none</b> 24 hours: 48 hours: 72 hours:						
28: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. <b>The fire area is very inaccessible, with heavy highly volatile fuel loadings. Fire history shows that, the area the fire is entering, has not had fire on it for 18 years. Extreme drought is allowing the fire to burn through areas that are normally covered with water. Potential remains for rapid fire movement towards the western and northern Preserve boundaries. Smoke may infringe on Interstate 75 forcing possible closures.</b>						
29: Natural and Cultural Resources to be protected (kind(s) and value/significance): <b>Traffic Safety on Highway 29; Interstate 75; Endangered Red-Cockaded Woodpecker habit and Florida Panther Dens.</b>						
30: Current Weather Conditions Wind Speed: <b>15</b> mph Temperature: <b>85</b> Wind Direction: <b>E</b> Relative Humidity: <b>53</b>						
31: Fuels/Materials Involved: <b>7 Southern Rough 3 and 7</b>						
32: Today's observed fire behavior (leave blank for non-fire events): <b>Active surface fire in pine/palmetto with torching and spotting in cabbage palms and fuel concentrations.</b>						

**Short runs occurred when fuels aligned with the wind. Good consumption on the fuels within the "contingency firing operation" on the Florida Panther NWR which was successfully completed by 1800 Hrs. today. With the continued pronounced east to west flow on the 20 ft winds, there was good ventilation and smoke was not an issue either on I-75 nor in the general Naples vicinity.**

33: Significant events today (closures, evacuations, significant progress made, etc.):  
**A 6 mile long and 1 mile wide fuel break burn on the eastern edge of the Florida Panther NWR east boundary was completed today.(3,036 acres)This mitigated the chance of any westerly spread of the fire. Line preparation and burn out operations along the northern perimeter were successfully completed, greatly reducing the chance of fire threat to Department of Forestry Protection lands. A Delegation of Authority has been drafted and reviewed which to the IMT by the Seminole Agency Acting Superintendent(BIA)for both Big Cypress Seminole Reservation and Miccosukee Indian Reservations which provides authority to take action up to 2 miles on tribal lands.**

**Outlook**

34: Estimated Control Date and Time:	35: Projected Final Size:	36: Estimated Final Cost:
--------------------------------------	---------------------------	---------------------------

37: Actions planned for next operational period:  
**Securing existing control and containment lines and monitoring the movement of the fire to south.**

38: Projected incident movement/spread during next operational period (in 12, 24, 48, and 72 hour time frames):

12 hours: **slight movement in Divisions C & D, otherwise no movement anticipated**  
 24 hours:  
 48 hours:  
 72 hours:

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**
2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?  
**Given the current weather patterns the probability for success of the current strategy is high.**

41: Projected demobilization start date:

42: Remarks:  
**This is complex of multiple fire which includes Strickland, Midrest, FT16, Trail, HP950 and other small fires. One new outbreak of the flu like bug was reported today. Hazmat clean-up of the 7,000 gallon fuel spill started today. Increase in costs are due to buying team update, and the update of Aviation Costs.**

**43: Committed Resources (Supplemental Committed Resources follow the first block)**
